

MST Simulated Sweat: Usage & Instructions

Made from a liquid that will not evaporate during training, MST Simulated Sweat is designed to make training scenarios more realistic. When used in tandem with MST Prosthetics and Odors, MST Simulated Sweat can take any training scenario to a new level of realism.

Usage:

MST Simulated Sweat is a standalone product and can be used in any training scenario. Put MST Simulated Sweat on the forehead of actors or mannequins to simulate heavy perspiration. MST Simulated Sweat may also be used on clothing to simulate sweat stains.

Cleaning:

MST Simulated Sweat may be cleaned by absorbing excess liquid and wiping up residue using rubbing alcohol. MST Simulated Sweat washes easily from fabric.

Warnings:

Do not use MST Simulated Sweat in the mouth or eyes. MST Simulated Sweat may make surfaces slippery during & after use.
